Plenary Session I

Day 1- 7 September 2026, Jacaranda Hall

1420 - 1530 Hrs

Scale & Speed: Role of the Private Sector in Achieving the 'Right to Win' in the Space Economy

Session will focus on how private space sector can rapidly build scale, agility, and competitiveness to emerge as a global leader. It will explore the critical enablers required for private players to move beyond early-stage innovation to large-scale commercialization. Discussion will also examine how private space companies can shorten development cycles, enhance execution speed, and align with global market demands to secure a competitive edge. Ultimately, the session aims to highlight what it will take for the private sector across the world to not just participate in, but decisively "win" in the evolving global space economy.

1530 - 1630 Hrs

Next-Generation Satellites: Transforming Space Capabilities, Space Services, and Sectoral Applications

Session will discuss how next-generation satellite communications are reshaping global connectivity and explore the technologies and applications driving a truly interconnected planet. Session highlights breakthroughs in broadband constellations, optical intersatellite links, and direct-to-device connectivity advancing resilient, secure, and inclusive digital infrastructure. Discussion may also highlight emerging commercial opportunities and sectoral applications, shaping the future of India's and the global satellite communications ecosystem.

1000 - 1100 Hrs **Earth Observation (EO) to Intelligence: Driving Societal & Business Impacts**

Session will explore how Earth Observation technologies are transforming decision-making across sectors by delivering actionable intelligence for societal good and commercial growth. Discussion will focus on how EO data supports climate resilience, disaster management, agriculture, urban planning, and infrastructure monitoring, while also enabling new business models for industry. It will also highlight how advanced analytics, AI, and satellite technologies are enabling data-driven solutions that create societal benefits and unlock new commercial opportunities. Speakers will highlight current gaps, user-industry needs, and the pathways to scale EO adoption through improved accessibility, analytics, and policy support, ultimately showcasing EO's role in driving both national development and market opportunities.

1145 - 1245 Hrs Europe- India Space Connect: Building Partnerships for the NewSpace Economy

Europe and India share a strong and growing partnership in the space sector, driven by technological innovation, commercial opportunities, and a shared vision for sustainable space development. With Europe's advanced space capabilities and India's rapidly expanding NewSpace ecosystem, there is significant potential for collaboration across satellites, launch services, Earth observation, communications, space exploration, and emerging technologies. Strengthening industry-to-industry partnerships can unlock new markets, accelerate innovation, and build a more resilient global space economy. This will explore opportunities for collaboration, innovation, technology partnerships, investment, and market access, shaping a more connected and competitive global space ecosystem.
